EDUCATION

University of Computer Studies, Yangon

May 2022 - May 2027

Bachelor of Computer Science, Software Engineering

- Current projects done: Fitness Tracking System, Online Learning System, Real-estate Project, FullStack Album Selling Website Using JavaEE, MySQL, Online Vendor Management System
- First Prize Winner – First Year (Roll 1)
- **GPA:** 3.9/4.00

TECHNICAL SKILLS

- | | | | | |
|----------------------|--------------|----------------|-----------|------------------------------|
| • React, ReactNative | • Express.js | • Figma | • Draw.io | • Web development |
| • Javascript | • Python | • VS code | • Postman | • AI agent and automation |
| • TailwindCSS | • MongoDB | • Git & Github | • Django | • System Flow & UML Modeling |
| • Node.js | • MySQL | • Docker | • n8n | • App development |

PROFESSIONAL EXPERIENCE

AI Ready ASEAN Youth Challenge 2026 Regional Grand Finals in Singapore — organized by AI Singapore & Support from Google Jan 5 - May 23, 2026

Edge AI Education Infrastructure for Rural Students

2nd Runner-up Winner among 11 ASEAN Countries

- An AIoT-based offline educational platform designed to provide digital learning resources to rural areas with limited internet access.
- Using Raspberry Pi to host and serve Large Language Models (LLMs) locally, allowing students to interact with AI without a web connection.
- Automatic updates via local ISP, physical drives, or satellite IoT. AI analyzes student learning history to prioritize content downloads, optimizing data usage.
- Technologies used - Raspberry Pi, Ollama, Piper TTS with ONNX format, FastAPI, React Native

AI Ready ASEAN Youth Challenge 2026 — organized by the AI Singapore & Support from Google Jan 5 - May 23, 2026

Edge AI Education Infrastructure for Rural Students

National Winner Representing Myanmar

- An AIoT-based offline educational platform designed to provide digital learning resources to rural areas with limited internet access.
- Using Raspberry Pi 5 to host and serve Large Language Models (LLMs) locally, allowing students to interact with AI without a web connection.
- Technologies used - Raspberry Pi, Ollama, Piper TTS with ONNX format, FastAPI, React Native

Code2Career Hackathon 2025 — organized by the Myanmar-Japan Center & JICA

November 2025

FloodSync- comprehensive mobile application

First Runner-up Award Winner

- Built FloodSync, a mobile app providing real-time flood monitoring and alert systems.
- Implemented data synchronization, alert logic, and responsive UI components.
- Implemented Push Notification Alerts – When flood risks increase, users receive immediate warning notifications.
- Enhanced skills in mobile development, real-time data processing, and application optimization.
- Applied Offline Learning Mode – Access essential disaster-preparation videos without internet.
- Technologies used - ReactNative, GlueStack UI, Zustand, Cloudinary

Venture Base Hackathon 2025 - organized by the NewNext International College & KBZ Bank October 2025
WolfEye Plus - PPE detection and Face Recognition System **First Runner-up Award Winner**

- Developed WolfEye+ (PPE Detection and Face Recognition System) to promote workplace safety through AI innovation.
- Reflects our commitment to community-focused innovation, contributing to Sustainable Development Goal by fostering safer, more resilient industries.
- Aim to reduce accidents and support a culture of responsibility and care in every workplace for every worker.
- Technologies used - React, TailwindCSS, FastAPI, YOLO, DeepFace, MongoDB

HackAtom Myanmar 2024 - organized by the State Atomic Energy Corporation ROSATOM August 2024
4D Proposal for SNPP **Participant**

- Lead a team of 5 people named NovaCore, I led a group representing the University of Computer Studies, Yangon in the HackAtom Myanmar 2024 Science Festival, held at Yangon Technological University.
- Developed a 4D proposal to build a small modular nuclear power plant in Myanmar, focusing on design, deployment, development, and disaster management.
- Strengthened my teamwork, leadership, and ability to apply technical knowledge to create social impact by contributing solutions aimed at reducing electricity shortages in my country.

UCSY Project Show and Job Fair 2025 September 2025
Mapito - AI powered Learning Platform for Beginner Developer **Consolation Award Winner**

- After completing two selection stages, my project "Mapito" was awarded a consolation prize among 60 project talented groups.
- The first stage judges are professors of our university and the second stage judges are from MCPA.
- Developed a web application designed to support beginner-level developers in learning coding more efficiently.
- Technologies used - React, TailwindCSS, Express.js, MongoDB, Gemini API, Cloudinary

ADDITIONAL INFORMATION AND ACHIEVEMENTS

Certification: Artificial Intelligence, AI for Project Management, Ethics in the age of Generative AI, Social Media Marketing with AI

Soft skills: Communication, consistency, teamwork, presentation, project management

Language: Intermediate English

Awards: Received the Central Level Outstanding Student Award, a prestigious academic honor, and was proudly featured in a national newspaper as a representative of student excellence across the country.
